

# DTS

## Drive Through Scales

The DTS range of drive through scales are designed and manufactured in Leicester by MWS. Its main feature is a low profile weighing deck for easier and safer loading by operators. Its design enables us to ensure that the unit is strong enough to cope with loads up to 2000kg yet remain less than 50mm high.

The DTS is manufactured in 304 grade stainless steel (316L available upon request) and is suitable for use in areas where there is an abundance of moisture. It is fitted with IP68 load cells and junction box as standard, making the DTS a truly waterproof floor scale built for the rigours of the food and chemical industry.

## Application

- IBC / Pallet Weighing
- Hazardous Area Weighing

## Benefits

- Safer and easier operator use with low loading deck
- Designed for food area hygiene and safety
- Manufactured in the UK by MWS Ltd using quality components
- Fitted with four SLB IP67 Load Cells
- Supplied with IP68 Stainless Steel Junction Box

## Options

- ATEX Load Cells & IS Junction Box
- Trade Approval to 3000d or 6000d (3000kg)
- Custom Sizes for pre-existing pits
- 316L Stainless Steel
