

LCP

Mild Steel Platform Scale

The LCP is floor scale is manufactured in mild steel and finished with a tough epoxy powder coat, rather than painted which will eventually flake.

MWS platforms are manufactured using a durbar top plate, with a no cost option of plain steel.

Other options that complement the LCP range are extra loading ramps, bespoke sizes and OEM fixing points for clients wishing to mount their products onto the platforms.

With any platform manufactured by MWS there are a number of options and sizes available as standard. However, we are also able to manufacture one offs and bespoke systems to suit exact client specifications.

Application

- General Purpose Weighing

Features

- Designed for Improved hygiene levels and ease of sanitation
- The LCP has a low loading deck of just 75mm, for safer use by operators when used with loading ramps
- Lower cost of ownership due to longterm lifespan of the product and components fitted
- Optional outer frame for protection from fork lift trucks
- Lifetime warranty on the structural integrity of the fabrication
- Components are covered for 5 years
