

TRACEWASTE

You can't reduce waste you can't see.

Real-time waste tracking for food manufacturers

TraceWaste records waste at the point it happens, capturing the weight and key information about what, where and why it is being wasted.

KNOW YOUR WASTE

See what's really happening on your production floor.

TraceWaste gives you a clearer picture of:

WHAT

Product, material or waste type

WHERE

Department, production line or location

WHY

The reason for the waste

HOW MUCH

Live weight data, recorded automatically

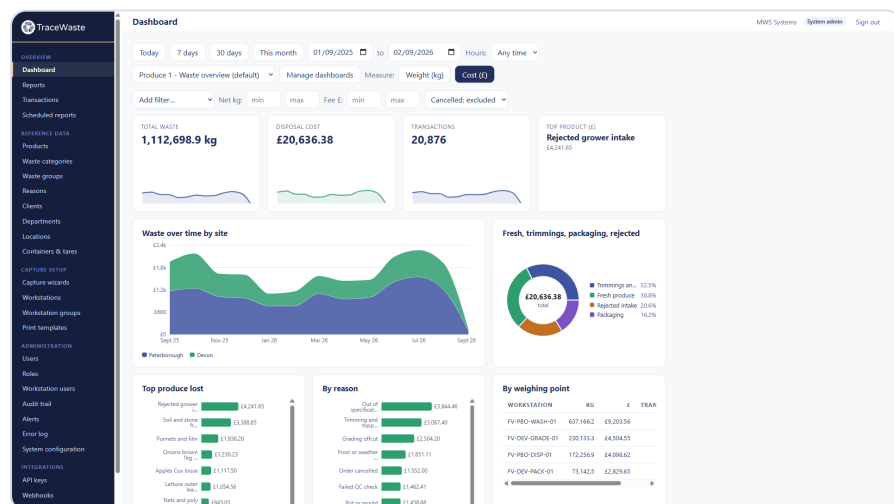

FROM WASTE TO USEFUL DATA

Stop relying on paper records and spreadsheets.

Waste is recorded as it is weighed, then available through a web-based dashboard for managers and production teams.

Use the data to identify problem areas, spot trends and decide where improvements could make the biggest difference.

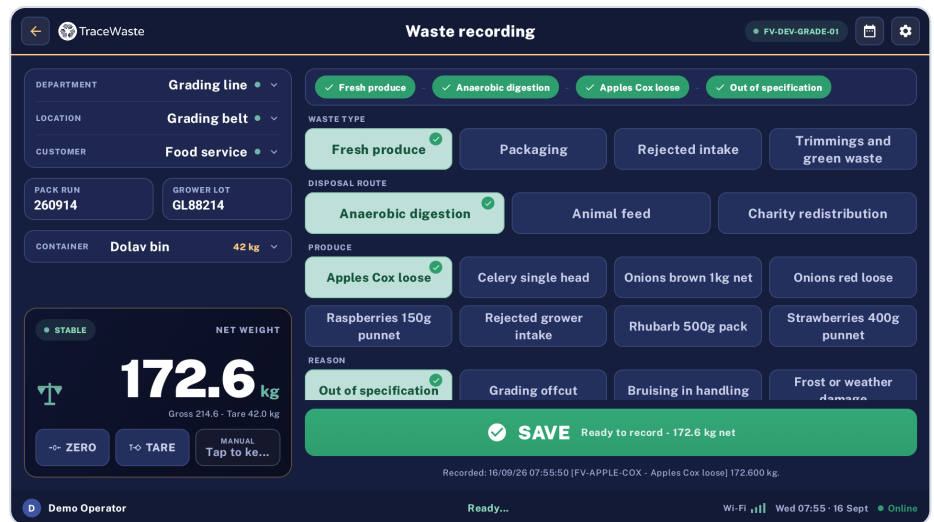

WEB DASHBOARD

Fully configurable reports, including cost and weight reporting by site, product, reason, weighing point and more. All in real-time.

TOUCHSCREEN CAPTURE ON THE LINE

Operators pick what, where and why from custom, pre-configured fields. The weight is then captured automatically.

BUILT FOR FOOD PRODUCTION

- ✓ Simple touchscreen operation
- ✓ Barcode and RFID options
- ✓ Automatic weight capture reduces manual errors
- ✓ Real-time data and reporting
- ✓ Fully configurable to your processes
- ✓ Low monthly subscription, no upfront costs
- ✓ Works with new or existing weighing equipment
- ✓ Cloud-based management system
- ✓ Fast to deploy, with minimal production disruption

OFF YOUR NETWORK, OFF YOUR TO-DO LIST

The system is cloud hosted and can run on a 4G connection, so it never has to be installed on your IT or production network. No complicated software installation, and nothing for your IT team to host.

How much is your waste really costing you?

See where the waste is coming from. Then decide what to do about it.
