## PRODUCT INFO

Myrias

Recipe Formulation Software

With Micro Weighing Solutions (MWS) leading the charge in innovative weighing equipment and our software partner MCI offering Myrias recipe formulation software, businesses have a range of options to streamline their operations, from budget-friendly solutions to comprehensive factory traceability systems.

At the heart of Myrias lies its core functionalities: recipe creation, filling process control, and reporting. With a focus on ingredient management, cost analysis, and traceability, Myrias empowers businesses to maintain control over their mixing processes while ensuring compliance and quality standards are met.

One of the key advantages of Myrias is its scalability. As businesses expand, Myrias can easily adapt to growing needs by adding more stations or incorporating additional modules. This flexibility allows businesses to build on their solution from a relatively low-cost entry point, ensuring long-term viability and efficiency.
